

Last 252 trading days, day by day

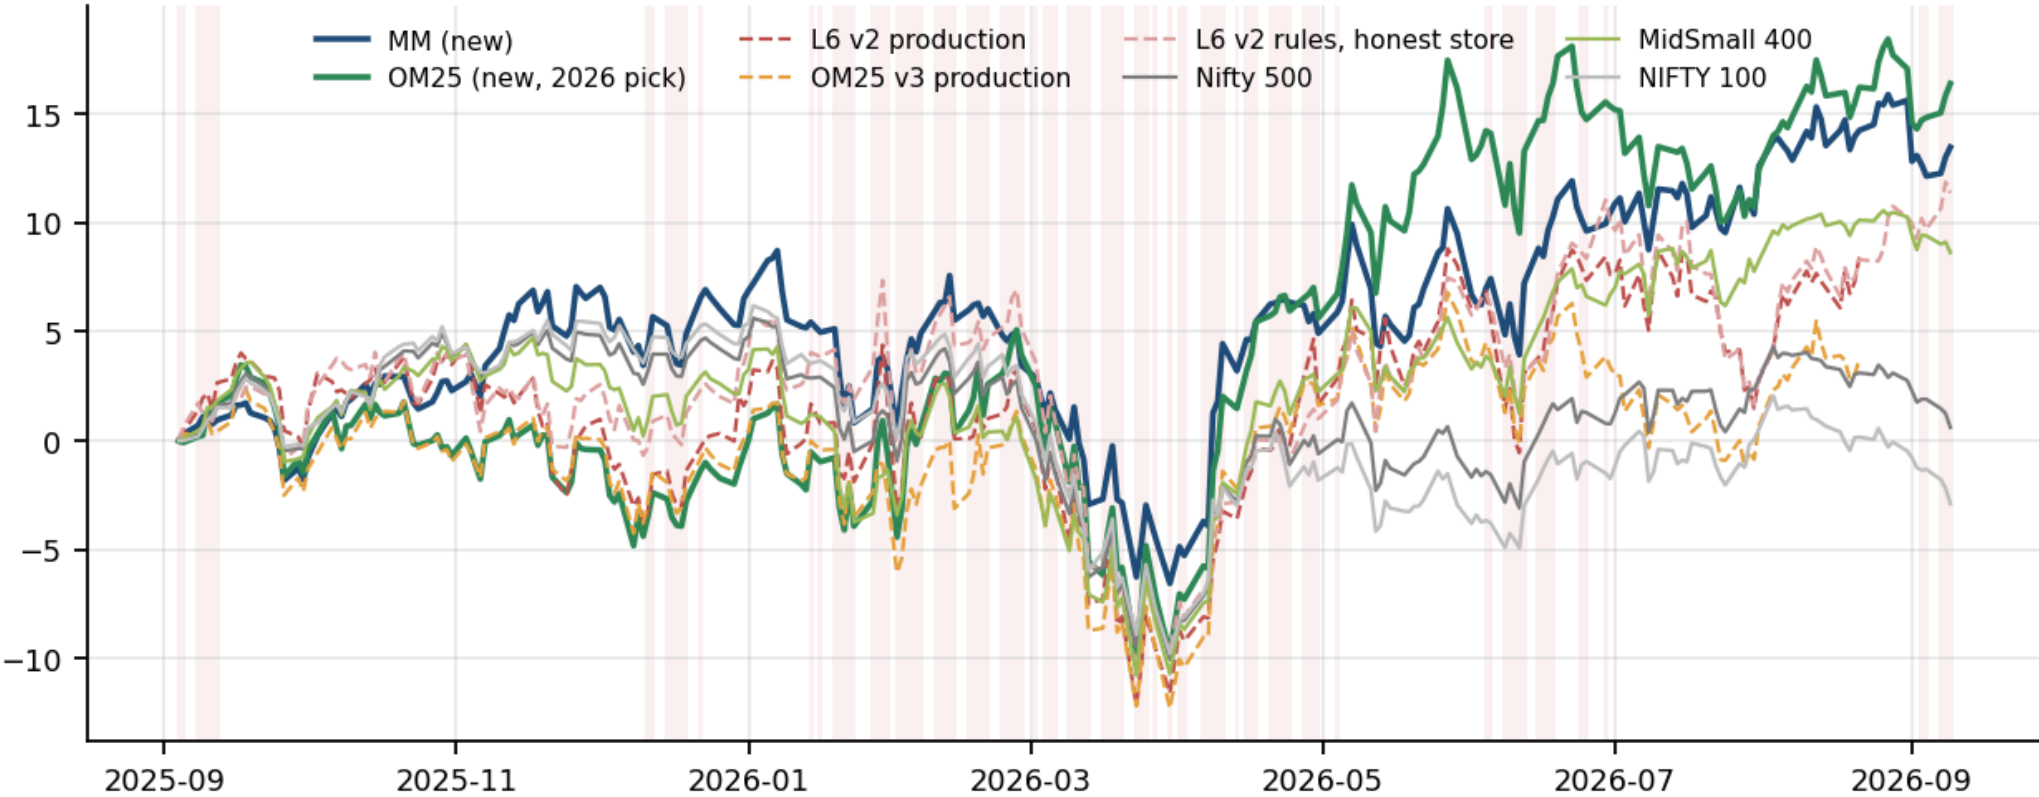

2025-09-04 → 2026-09-09 · new books from the honest store (net 20 bps); production books from their own pipeline files (to 2026-08-21, own price panel); benchmarks are price indices; MidSmall 400 real index to 2026-05 then spliced · generated 2026-09-11

Production series end on 2026-08-21 (their pipeline's last run), so their figures cover the window to that date; the new books and benchmarks run to 2026-09-09. The MidSmall 400 is the real index to 2026-05-08, then Midcap 150 plus the real Smallcap 250 to 2026-08-21, then Midcap 150 plus the point-in-time small-cap basket. Regime shading is the MM book's ROC31/c3 state as known each morning.
